<p>H</p> 	(4)	stacking connector <i>optional (used to stack multiple units)</i> <i>remove leveler feet and replace with (H)</i> <i>to stack second unit.....</i>

ASSEMBLY

1. Begin by identifying the top and bottom of pole support sections (B & C) see illustration above.
2. Next insert support pole connector (D) between support pole sections and screw together. Repeat for all four support poles.
3. Screw lever feet (F) into the bottom of each pole (these are used to adjust the shelf when on unlevel surfaces). (preassembled on some models)
4. Finish by adding post cap (G) to the top of each pole. (to stack additional unit, remove cap (G) and add stacking connectors (H))

ASSEMBLY

1. The shelves (A) are held on with pairs of the shelf support clips (D). Align two halves of the shelf support clips (D) on the support pole at the desired height of the bottom shelf. ***When clips are together they form a slight cone shape. The top of the clips is the thin end.***
2. The shelf support clip (D) is in the proper place when the raised ridge on the inside of the clip locks into the ridge on the support pole.
3. Repeat for all 4 support poles so all clips are at the same height. **THE BOTTOM SHELF MUST GO ON FIRST, THEN WORK YOUR WAY UP.**

ASSEMBLY

1. Slide all four poles through shelf. Once you have verified that all support clips are aligned push shelf firmly down until snug.

ASSEMBLY

1. Repeat steps from page 4. Locate clips at desired height for middle shelf.
2. Repeat steps from page 4. Locate clips at desired height for top shelf.

ASSEMBLY

1. Use leveler feet to adjust legs when shelf is on an uneven surface.

****Warning: Steel shelving units should not be overloaded and heaviest items should be stored on the bottom shelf. DO NOT stand or climb on shelving units. If children are present shelving units should be secured to a wall to prevent tipping and injury.**

****Warning: Steel shelving units should not be overloaded and heaviest items should be stored on the bottom shelf. DO NOT stand or climb on shelving units. If children are present and/or shelving units are stacked they should be secured to a wall to prevent tipping and injury.**

stacking additional unit
