

NOTE:
2 people are required to install the winter cover.

Steps

1. Unfold and determine position of winter cover based on the longer and shorter sides of your shelter. Keep in mind the placement of the door. Ensure the seams of the winter cover are on the inside.
2. Use two stepladders, outside of the shelter, in two neighboring corners.
3. Slide the winter cover over the structure delicately to avoid tears.
4. Fold the excess material at the bottom, outwards.
5. Put weights over the folded winter cover or attach firmly to the ground using the eyelets.
